Mr. Maurice W. Nittler  
P. O. Box 94  
Geneva, Nebraska

Dear Mr. Nittler:

Thank you very much for your report of reception of "Copper" - KOPR on 31 January 1956. Your report is apparently correct in that KOPR does leave the air at 11:30 P.M. MST and the portions of our sign off format you quoted are correct.

For your information, at the time of reception, KOPR was operating with directional antenna, a three-tower wide-spaced array. Towers are 325 feet high and spaced 396 degrees with center tower off-set to the west by 49.6 feet. Our transmitter is a Gates model BC 1E using 833A tubes in final and modulator stages.

If at any time in the future you decide to visit the "Treasure State" please stop in Butte and I'll be very happy to give you a tour of our plant.

Best regards from a former Kansas,

Yours very truly,

A handwritten signature in blue ink that reads "Wm. H. Emerson".

Wm. H. Emerson  
Chief Engineer
