250 WATTS — 1400 ON YOUR DIAL — UNLIMITED TIME

GLENDIVE, MONTANA

April 13, 1955

Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Sir;

Please accept this letter as confirmation of your report of reception of our test signal on the morning of April 11, 1955 (1:55 - 2:10 AM M.S.T.)

You quoted my words, not verbatim, but close enough to leave no doubt that it was our signal you heard.

Our equipment is Collins and General Radio.

Incidentally we were $3/10$ of one cycle over 1400 KC. as reported this morning by Commercial Radio Monitoring Co. Kansas City.

Yours truly,

Don Powers
Chief Engineer.
