Mr. Maurice W. Nitler,  
Englewood, Colo.,  
U. S. A.

Dear Mr. Nittler:

I've received your report of reception of special DX program aired for XEXQ, on March - 13th, thank you very much.

Your logging agrees with my programming, so this is the verification of your reception, really was a good thing you made up this logging because, conditions were very bad, also a testing carrier in same freq. and + with a terrific hoarseness, I had a "basso profundo -- voice", according to Ernie Cooper.

Effectively, Ev Johnson and yours truly are very good friends, always<sup>he</sup> writes me at least once a week. He is a great fellow;

You have nothing to thank, I did it with great will, trying to do my best. XEXQ is my University station, Head was once my pupil in my College Electricity Course, so he was my operator and I think program by itself was successful but spring noise was enormous, Ev could not hear me, as you did. Thanks for all yours

*Gene*
