Daer Maurice,

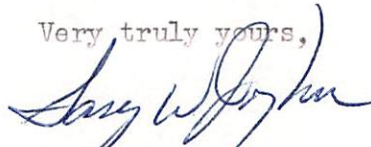

I received your very nice DX report today and was real glad to know that our signal is getting out your way. I hope you had better luck this week. Maybe one day the other station will sign on the air late and we can really have us a ball.

First let me say that your listing are correct and I for one am real glad to hear from you. I was in your town quite a lot while I was in the air force. I was stationed at Cheyenne and I was in Denver nearly every weekend. I can say that I hope to get back to Denver to live before I die. I have never enjoyed any town as much as I did Denver. That mountain air just got in my lungs and I'll never get it out unless I get back. I was married in the town of Greeley. In 1957. So I am no stranger to your beautiful and wonderful state.

The transmitter here is a Collins 21-A and has a output of 5000 watts. It is a real old one. 22 years old. The station is a rather new one, we just signed on the air last may and have been signing on at 4 in the morning since january 1st of this year but already we are the number one station here in this area. I just hope we can hold on to this spot.

If you are ever over our way drop by to have a cup of coffee and chat awhile. It would be a real thrill for a young radio man to meet you or any members of your fine club. I want to wish you the very best of luck in radio and the best of '73's.

Very truly yours,

Gary Joyner,  
Engr.
