Dear Mr. Nittler:

Thank you very much for your listener's report of August 7, 1954. Please forgive the lateness of this reply.

Considering the type of receiver you are using, I would say that your record of 41 states is very remarkable. I don't believe a better record has been sent us by those using much more elaborate systems.

Our station uses an RCA 1000 watt transmitter and at the time you logged us we were operating with our required night-time pattern which beams our power in three major lobes; north, east, and west.

Please consider this letter one of confirmation of your reported reception.

Respectfully yours

J. F. Main
