218 - 236 - 7900

February 7, 1975

Mr. Bill Nittler
603 West 1st Street
McCook, Nebraska 69001

Mr. Nittler:

Thank you for your response to our program and frequency test we conducted for members of the National Radio Club on January 14, 1975. I have had so many responses to our test that I am now getting to the bottom of the stack.

your program logging between 2:02 and 2:12 AM CST is correct.

As far as checking our records for your reception of us when we were KUTT. . .there are no records left. We are only required to keep records for a period of 2 years, and after that they are destroyed. I will assume what you heard and logged are correct.

Enclosed is our current coverage map.

Sincerely,
KQWB & KWIM-FM

Curt Peterson
Chief Engineer

Enclosure.
