THE KEY TO MODERN RADIO

Scottsbluff, Nebraska

690 Kc 1000 Watts

Phone 632-4119

September 25, 1962

Dear Maurice,

This confirms your reception of our station on the morning of September the 16th, 1962. Your listing of our programming was correct and I confirm your reception of KEYR on the above date.

Right now I'd like to thank you very much for letting us know about your reception of KEYR. KEYR is a rather new station just about one and a half old. We use all R.C.A. equipment except for our tape decks which are Ampex, a real nice setup we have here.

If you ever get to this part of the country stop in and say hello. By the way Terrytown is a corporate village between Scottsbluff and Gering which are twin cities, it's kind of a suburb. You've got some pretty nice equipment, HQ-180, pretty nice! By the way my name is Roger Bartlett, I'm chief engineer here at KEY-Radio.

Thanks again for your report of reception and we might see you some time.

Yours truly,

Roger "ROG" Bartlett
chief engineer

p.s. Enclosed is one of our program skeds. Thanks once again!
