Dear Bill Nittler
Box 824
Mancos, CO 81238

Dear Bill:

Thank you for your receiving report of September 12, 1984. KSWN currently is simulcasting with KFNF, Oberlin Kansas and operates with 5000 watts power via a two tower directional antennae.

You were evidently hearing a critical hours skywave signal off the "back" of the antennae.

Thank you for your DXing report.

Sincerely,

Ed Briley
