Mc Cook, Nebraska 69001

Dear Mr. Nittler:

Thank you very much for the reception report on KNCY as of December 10, 1976. I am really very surprised you were able to pull it in. I have worked at the stations you mentioned. KRFS in 1962, KGMT 1963, and I put KOTD on the air in 1969. Its a three tower directional with most of its power going toward the south, with the pattern you should have had no problem picking it up.

I can't imagine the problem with getting KGMT unless there is somebody west of you on 1310.

Having been a ham since 1958, I have done some Broadcast DX also. I have been looking at several loop antennas to build, and haven't decided on the best one. Does your antenna use a RF pre amp ?

Regards,

David J. Messing
