Bill Nittler
P. O. Box 824
Mancos, CO 87328

Dear Bill,

This letter confirms your reception of station KTBL(AM), 1050kHz, on April 26, 2001 between 7:28 pm and 7:73pm. KTBL(AM) operates with one thousand watts of power into a three element directional antenna aimed directly north. The power gain of the array is approximately two, so the effective radiated power in your direction is approximately two thousand watts.

The program description you provide in your reception report has been confirmed to be correct.

You have previously reported reception of this station in its previous lives — as KHTL(AM), KNML(AM), and, perhaps as KHFN(AM) and KJBO(AM).

Best of luck to you -- and good DX!

Sincerely,

Mike Langner
Chief Engineer
