Dear Mr Nittler:

Thanks very much for the very fine letter and signal report from Geneva Nebraska. I was running the useual freq test with RCA communications Station when you heard me. Point Reys Station which RCA Communications station is located is in Calif.

Winnemucca is Located 166 miles North East Of Reno on U.S. Highway 40. It is a town of 3000 located in the desert country with lots of Sage Brush. The station is a remote control station and the transmitter is located about a mile from the studios which are in the Sonoma inn here. You might remember the Sonoma inn when you stopped here for gas. All the equipment here is Gates all the way through form turntables to transmitter. Our Power here is 250 watts. Antenna is a 200 foot steel vertical.

So guess thats about all the info on our tea kettle here. Thanks once again for the nice letterq and report and if you get into Winnemucca again someday stop by and say hello.

Regards and best of BCL listening

Whitelaw Reid Ross-Chief Engineer KWNA
