Dear Bill

Thank you for writing to KXNO for a second time. I'm sorry that we did not respond to your first letter that you sent to us back in May. My only thought is that we did not receive your first letter regarding your QSL.

KXNO operates with a power output of 10,000 Watts day-time non-directional and a Night Time power of 2500 Watts directional. My guess is that you caught our station just before power change at 1945. At the time you heard us we were at 10,000 Watts non-directional.

Hopefully this will act as verification for your files. Should you require any more information please feel free to get in touch with us

Best Regards

Tom Holmes
