P. O. BOX 588

PONCA CITY, OKLAHOMA

15 April 1954

Mr. Maurice W. Mitter
Shickley, Nebraska

Dear Mr. Mitter:

This will serve to verify your reception of signal from WBBZ at 3:15 AM EST on 16 March 1954. At that time I was checking the operation & calibration of the transmitter and monitors.

For your information the weather here was clear the temperatures between 55° & 65° & weather - DRY. We use a 250 watt Gates 250G4 transmitter, feeding a series fed 165' vertical guyed antenna, via a 450' 50 ohm transmission line.

Yours truly
Charles W. Chavory
Chief Engineer
