McCook NE 69001

Dear Bill:

Here is your verification of your reception of KXVQ. You were correct on the programming played at the time that you said. At the time of your reception we were on 5000 watts with a 2 tower directional pattern. I am enclosing a coverage map and am sending this letter in some of our station envelopes so you can add to your collection if you already have one. Good luck to you in your further endeavor of radio station reception and bad luck to you in the Orange Bowl HA HA everybody at the "Q" are very avid OU fans.

Sincerely yours,

Bill Coleman
