Geneva, Nebraska

Dear Maurice,

Many thanks for your report of the special program that I put on for the NRC on January 12, 1957. I have received many letters from all over the country and it has taken a long time to answer all of them.

The antenna here is 265 ft and the ground system is made up of 120 radials 300 ft long. We operate our transmitter (RCA BTA-1M) by remote control (Rust). The transmitter is about five miles from our studios and is completely unattended.

Once again, many thanks for your report.

73,

Don Wilkinson, C.E.

Radio Station KPDQ
