Bill Nittler
P.O. Box 112
Englewood, Colo. 80110

Dear Bill:

Please accept this letter as official verification of WEND on January 26, 1970 from 3:25 until 4:00am EST. I was quite pleased to receive your report, since yours was the only one from Colorado.

The test was a great success with reception all the way to Hawaii. Several reports were received from the West Coast, also. You mentioned interference from KDAY; don't they sign off at 3:00 EST? In all, we received about 50 reports from 22 states and Canada.

WEND is licensed to operate with a power of 1000 watts and a Canadian restricted power of 250 watts, non-directional. During our test we operated with 1000 watts.

Thank you for listening and taking the time to write us.

73 and good DX
