Bill Nittler
P.O. Box 112
Englewood, Colorado

Dear Bill,

Here is a letter of confirmation for your records that you record our signal during the special IRCA test we conducted Monday, March 11. Your description of the programing during the test is correct.

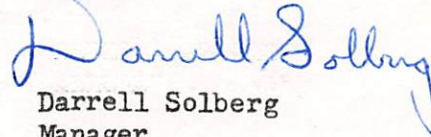

It was the first test of this sort that I or the station has participated in. It was a rather interesting test to participate in and it is real interesting to get as many letters as I did.

I received 10 letters thus far from six states and Canada. I didn't think we would reach out as far as we did.

Just a little bit about our station. This is our third year on the air. We feature mostly middle of the road music with some country-western in the morning. We also carry the play-by-play of all of our high school basketball and football games. I have been with the station since it started. We are full time with a power of 1000 watts at day and 250 watts at night.

I hope this letter is sufficient for your records.

Sincerely,

Darrell Solberg
Manager
