Dear Bill,

Sorry to hear about your report going unanswered. I don't recall ever seeing a letter from you. We'll try to correct that right now.

Checking station records, your report does seem to be in order. At the time of your report, we conducted frequency checks monthly. We now schedule them on a quarterly basis. Our check on Feb. 1, 1970 was conducted from 12:15 a.m. until 12:30 a.m. CST. Station breaks began at 12:15 and generally every 3 minutes until 12:30. Here, there may be some difference due to clock settings, but as I said station breaks will usually run every three minutes.

I trust this is what you need for your verification. If I can help you out in any other way, let me know.

Best regards,
