

*Today's Best Country!*

15 December 1995

Mr. Bill Nittler  
Box 824  
Mancos, Colorado  
81328

Dear Mr. Nittler;

Thank-you for your reception report of October 29, 1995. Your report was indeed accurate in regard to our station programming. Please accept this letter as a confirmation of your report. I apologize for the delay in the reply.

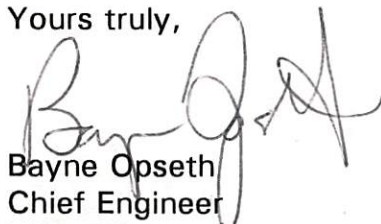

We are a relatively newcomer to 750 kHz as prior to July 14, 1995, we had been on 1420 kHz for 29 years. As we were on 1420, we are still 10,000 watts, omni-directional day and directional antenna at night. We are also stereo.

I had been through your area quite a number of years back, and travelled the "high" way between Durango and Grand Junction. I was very impressed by the scenery.

Once again, thank-you for your reception report and best regards for the Holiday and 1996.

Good DX'ing.

Yours truly,

Bayne Opseth  
Chief Engineer  
VE5BKO
