Mr. Maurice W. Nittler
Box 94.
Geneva, Neb.

Dear Maurice;

Thanks for the letter telling us that you heard our station. And this is confirmation that you heard Radio Station WEKR in Fayetteville, Tenn. Jan. 26, 1955.

We operate with 250 watts output with a 150 foot antenna. We are affiliated with the Mutual Network and the Associated press.

Am glad you enjoyed the program and I think next Frequency check, which is each 4th Wednesday morning in each month, I am going to play some more records as I got three letters this time.

Maurice, I am a Ham radio Operator with the call of W4MQV. I operate on 75 meters mostly and am also interested in Country Music, besides being Chief Engineer here, I am also Country Music DJ. I play the Guitar (Les Paul Style) I mean the guitar not my playing..Hi..Hi. and also play the country fiddle.

Here while back I got interested in picking up broadcasting station and I would see how many I could pick up in daytime and I have a Ham rec. An HQ-129-X and I can on a clear day pick up around 60 station in the middle of the day..The rec. is very good...

I can hear Corpis Christi, Tex. in day time here. I'll tell you a good little Army surplus rec. that is real selective for the bdcst band is one of those little command receivers that come with the 274-N...I for get the number but it covers from around 500 KC. to around 1500KC. and it is really hot, it doesn't have an audio amplifier, it was made to use headphones. Well, I see I have run out of paper so Good Luck and thanks again, Maurice 73

Sincerely,

Ernest Tucker
