Dear Maurice,

I am happy to report that you did tune in WHEY the morning of September 3 as stated in your letter. I might add at that particular time I was radiating near 265 watts. Our tower is only 125 feet high due to it being located at the end of the jet runway here at the Naval Air Station. Actually there's less than a mile separation.

I have gotten reports from all over the country and several foreign countries but yours is the first one from the state of Colorado.

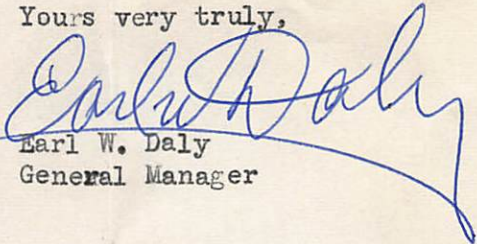

Millington is located about seven miles from Memphis, Tennessee.

Our regular frequency check is the first Wednesday morning of every month from 2:15 until 2:30 CST.

Thanks for the letter.

I remain

Yours very truly,

Earl W. Daly
