Box 94
Geneva, Nebraska

Dear Sir;

This is in verification of your letter about reception of WMCH on November 25, 1954.

For broadcasting, we use a Collins, 20V 1000 watt transmitter and speech equipment of same make. The finals are two Eimac 4-400A beam tetrodes, with two Eimac 4-250A's in push-pull for modulators.

I appreciate your interest and wish to appologise for the delay in replying.

Yours very truly,

J.E. Ruth
Chief Engineer
