NASHVILLE TRUST BUILDING • NASHVILLE 3, TENNESSEE

Nashville, Tennessee

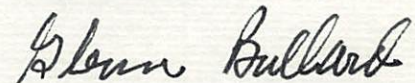

December 13, 1956

Dear Mr. Nittler,

This is to verify your reception of W S I X on the morning of December 10, 1956. Many thanks for your interest.

The transmitter of W S I X is a Collins 21A which has been used since 1942. Our antenna is a three element array. During the daylight hours the station is non-directional. At night stations K M B C in Kansas City, and W R C in Washington, D. C. are protected. It is a possibility the Kansas City station was the one you were receiving along with W S I X.

Very truly yours,

Glenn Bullard
Studio Engineer
