SAN ANTONIO 22, TEXAS

April 13, 1962

Mr. Maurice W. Nittler
1755 S. Vallejo St.
Denver, Colorado

Dear Sir;

This is to confirm that the signals you heard on April 9, 1962 were indeed those of Radio K-B-E-R in San Antonio, Texas. One suggestion though, if you would tell your friends of the National Radio Club to suggest to thier members that they make up some sort of card that does not require a formal letter of confirmation, I'm sure that you would recieve a greater percentage of replies. I know that as far as myself is concerned this would help very much since I recieve quite a number of requests for confirmation.

The transmitter at this location is a Collins 20-V-2, 1000 watt fed into a three tower directional antenna array.

Best of luck and the best of DX to you,

Sincerely,

R. E. Jones, C. E.
