June 6, 1960

Dear Mr. Nittler

We appreciate your very nice report on our stations transmission of June 1, 1960.

We just recently installed new equipment, Collins Transmitter and Console complete with new tower. We are operating with 250 watts power. So I would say that you have a very good receiver to be able to receive us at that distance, however at that time of morning signals really get out at times.

As a rule we sign off the air at 11:30 at night, however on June 1st, we remained on the air because of bad weather alerts in our area.

Thanks again for your report.
