Your Good Will Station
HILLSBORO, TEXAS

Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear sir:

I'm happy to verify your reception (in Part) report of KHBR 1560kc. Apparantly the other station you referred to in your letter was giving considerable interfernce. We were on the air September 19, 1954 from 6:30 am until 6:30pm. Part of what you reported to have heard over our station was correct, however the music you heard at that time was from another station. the commerical you specified in your letter was correct. I was delighted to hear that you were able to pick us up at all. KHBR is a 250 watt daytime grid*modulated NON-directional antenna. It was nice indeed hearing from you and any time we can help, let us hear from you.

Yours truly,
Gene Stanley
