December 4, 1987

Mr. Bill Nittler  
Box 824  
Mancos, Colorado 81328

Dear Mr. Nittler;

Thank you for your reception report dated 22 November 1987 for KLDD radio station as heard in Mancos, Colorado. I am pleased to verify your report as being correct. As the station does not currently issue QSL cards, please accept this letter as verification of reception from 6:55PM to 7:02 PM on 570 kHz using a Hammarlund HQ-180 receiver.

KLDD operates with directional antenna 24 hours per day on 570 Khz with different patterns day and night. Normally we do not receive reports from your locale as it is not in the lobe (strong signal) location of the directional pattern. Transmitter power is 5.0 kW day and night using a 3 tower directional system. Most energy is radiated to the south over Dallas/Fort Worth. No protection is afforded to KLUB but they do dominate the southern Colorado area at night.

Thank you for your report. Good DX-ing!

Most sincerely,

*Hue Beavers*
