Denver 23, Colorado

Dear Sir,

I'm very sorry that I haven't answered you before now but as things have been rather hurried around here I haven't had the time.

I would like to say that we weren't affected by the GAL CARLA here in Alice ourselves as bad as the surrounding areas. I was quite surprised in learning that our signal was received where you located. We some times wonder if we're reaching past the city limits.

We operate on the assigned frequency of 1070 KC's with 1 kilowatt.

Real nice to hear from you. Any time that we can help you let us know.

P.S.
I almost forgot. We were Broadcasting at the time and the way you described in your letter.

Bill Craig

Program Director
