Maurice W. Nittler
3663 South Clarkson
Englewood, Colorado

Dear Mr. Nittler:

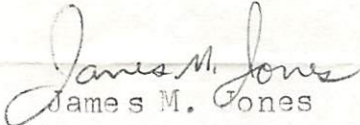

Excuse the delay in answering and making confirmation of your reception of this station on Monday morning April 3, 1961.

Each First Monday of the month at 5:15 AM is the time we make out regular frequency measurement tests.

It is a wonder that you heard us through KFH. It seems in this case that you may have copied us a little better than the fellow doing the frequency checking. I think that some other station was also making a test at the same time on the frequency that day. We turned the carrier off at 5:30 so if you heard anything tone modulated after that it wasn't us

We are 500 watts with non-directional antenna...200 feet in height. Our operation is daytime only...with a grant to sign on at 6AM continually in the morning.

Yours Truly,

James M. Jones
