Denver 23, Colorado

Dear Maurice:

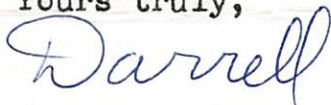

This will confirm your reception of KUKO on the morning of December 12, 1962 during our monthly frequency check.

We make this test on the second ~~Tuesday~~ of Wednesday of every month from 1:15 to 1:30 a.m. The frequency is measured at ~~in~~ Lees Summit Missouri.

In the next few months we plan to be building a new station at Ralls, Texas about 35 miles from here. It will be 1000 watts on 1530. It will have the tower located in a lake bed and we are interested in seeing the distance ~~w~~ it will cover when we test.

Thank you for your report.

Yours truly,

Darrell Willis
