Maurice,

In reply to your letter of June 28, I would like to thank you for your report. At this time we had been experiencing difficulty in getting the modulators to balance. The purpose of that transmission was to balance the modulators and to reload the finals. We are using a Gates BC-1J transmitter with 833-A's in the finals and also modulators.

Our turntables are also Gates as well as all our studio equipment. We are using a 225 foot base-loaded guyed steel tower as the antenna.

Thank you once again for your report, and I hope to hear from you again in the future.
