

KXYC 1400 AM

January 13, 1986

Mr. Bill Nittler
Box 824
Mancos, Colorado
81328

Dear Bill:

This letter is to confirm your reception report of KXYC-AM, 1400Khz, on January 1, 1986.

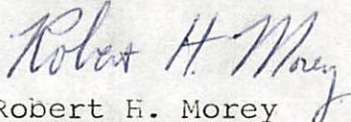

We appreciate you notifying us of your reception.

We are quite surprised that you would be able to pick us up at that time of the day, but your report follows that of a Billings, Montana man who picked us up during pre-twilight hours several weeks ago.

For your information, KXYC-AM is licensed to Provo, Utah with studios in Orem, Utah. Our antenna and ground system were installed in 1947, and haven't been changed or moved yet. The antenna measures approximately 180 feet, and is situated in the Provo industrial park, about 400 yards from Utah Lake, which may help our conductivity. KXYC broadcasts at a power of 1,000 watts day and night.

Once again, thank you for your letter, and good DX'ing!

Regards,

Robert H. Morey
General Manager
