Mr. Maurice W. Nittler
Box 94
Geneva, Nebraska

Dear Mr. Nittler:

WAFC is pleased to verify your reception of our signal
from 4:40 A M to 4:50 A M Feb. 2 Standard Time.
Thanks for your interesting report.

This may be the greatest distance which we have
received a report. Had one from Ponca City, Oklahoma
today, another from Toronto, Ontario.

We are delighted that we are getting out so well
when on at night.

The transmitter of WAFC is a Gates Model BC-1F, with a
power of 1,000 watts operating on 900 Kc. with high level
modulation. Our antenna is a triangular cross section guyed
with a breadth of 22 inches and a height of 255 feet.

Wishing you every success in completing your desired list
of stations, we are,

Cordially yours,

RADIO STATION WAFC
