Dear Radio DX'er,

Thank you for the very fine Radio Signal report you sent. We are always pleased to receive notice as to how well and how far KASL is producing readable modulation.

As Engineer of KASL radio, these signal reports are of the utmost importance to our planning and expansion ideas. We hope in the very near future to increase power, change frequency and thus, hopefully bounce a more respectable signal off the Ionosphere (to which all DX'er's bow 3 times daily in awe!).

In all seriousness now, I thank you once again for the signal confirmation and your interest in radio wave propagation.

Sincerely,

J. D. Smith, Chief Engineer
KASL Radio Station
216 West Main
Newcastle, Wyoming 82701

JDS:asf

P.S. Bill, Thanks for being a Regular.

J.D.
