Bill Nittler
Box 112
Englewood, Colorado

Hi again, Bill!

Thanks so much for your reception report on KLME. I was working here tonight, and while looking for a pen in the program director's desk, found your reception report, with a note, "GIVE TO BOB" on it. Seems that they must have forgotten to give it to me. So, if you will forgive us for the delay in this,

THIS LETTER IS TO CONFIRM YOUR RECEPTION OF RADIO STATION KLME,
1490 KHz, ON NOVEMBER 7, 1968.

I am still chief engineer of KOWB here in Laramie, but have been "moonlighting" out here, since KLME does not have an engineer any more. So, if you guys would like a DX program run on KLME, or possibly another one on KOWB, just let me know, and I'll be glad to arrange it if you will give advance notice to the other clubs.

In the future, you might have a note put in your newsletter to direct all reception reports for Laramie stations directly to my personal address:

Bob Rule
Box 1054
Laramie, Wyoming, 82070

That way, you won't have to worry about them getting lost like this one did.

So, hope to hear from you guys sometime. Since KOWB doesn't know I'm working out here too, please don't ever send anything to KOWB which will spill the beans. Seems that all mail addressed to me as simply Chief Engineer at KOWB gets "accidentally" opened.

73's

Bob Rule

Robert R. Rule, WA7EGK
consulting engineer, KLME
