McCook, Ne 69001

Dear Bill:

Thank you for your signal report on January 25, 1979.

First of all, we apologize for the long delay in answering your letter; the goof was mine, misplacing your letter.

Our transmitters are located in Baldwin Hills, approximately 400 feet in Los Angeles. The transmitters are Twin Collins 831-D, feeding a Jampro Three Bay Antenna. We radiate 3,000 watts ERP. I checked your program detail, and found it to be accurate, verifying the fact you received our signal.

Again, thank you for your fine report, and good luck with your great hobby.

Sincerely,

A handwritten signature in cursive script that reads 'Rene Tidwell'.

Rene Tidwell
