

July 19, 1995

Bill Nittler  
Box 824 533-7197  
Mancos, CO 81328

Mr. Nittler:

Thank you for your signal report. It is rare to get a report from so far away. Since my time here (about 5 years), yours is the most distant report that we have received. I recently received a report from San Antonio, but that was of reception a couple of years back. The announcements you detailed in your letter are definitely on our log for July 5, 1995.

KLON's transmitter is located on Signal Hill in the City of Signal Hill, CA. The station is licensed to Long Beach, CA. and our studios are located on the campus of California State University, Long Beach. Our height above average terrain is 129 Meters. The effective radiated power of the station is 8,000 Watts.
