Mr. Bill Nittler
603 W. 1st
McCook, NE.

Dear Bill:

Boy KIIQ gets into some strange places! We've received letters from all over the west and mid-west, but this is the first from the McCook area. We are a 75,000 watt station with our transmitter on top of 11,000 ft. Cheyanne mountain.

You must have received a very clear signal. Your description of what you heard on the air was quite accurate.

Thanks for taking the time to write, and if you are ever in the Colorado Springs area be sure and stop in.

Sincerely,

D. J. McCoy
