PROGRESSIVE RADIO

3 October 1977

Mr. Bill Nittler;
McCook Nebraska

Dear Bill;

Very happy to hear your reception report, it's our first from Nebraska since we upgraded our equipment on the 22nd of last month.

We went from an ERP of 25 kw to 100 kw horizontal and vertical; and an increase of from 37 feet to 1,330 feet above average terrain. Our new Collins transmitter is located on Horsetooth mountain, immediately West of Fort Collins. The antenna is a ten bay Collins; elevation of the radiation center is 7,215 feet above mean sea level.

A handwritten signature in dark ink, appearing to read "Ronald G. Krob".
