Bill Nittler
McCook, NE,

Dear Bill,

I was glad to see you received KTR-FM on July 12, 1977 in McCook.
Your logging of our broadcast between 8:15 and 8:25 am, was accurate.

At the time you were listening, KTR and our AM station, KSIB were simulcasting.

KTR is a stereo station, licensed at 3000 watts, with a radiated output of 2.45 kilowatts. The antenna is at a height of 220 feet. The transmitter is a Gates 3H.

The format on KTR is automated Country Living music.

It was good to hear from you, and good luck in your DXing.

Sincerely,

Rod Haag
