McCook, NE 69001

Dear Bill:

Thank you for your signal report of our station. Your log does indeed correspond to our operating schedule, and we therefore verify reception.

Sorry this has been so long in coming, but we have been busy preparing to move our studios to the other side of the University of Northern Iowa campus and have run short on time.

We received several reports from last June and July, mostly due to sporadic-E skip and from as far away as Florida.

Again, thanks for the report and we hope to hear from you again.

Sincerely
John B. Preper
Engineering Assistant
