

STEREO FM 92.3

WGTC

August 15, 1980

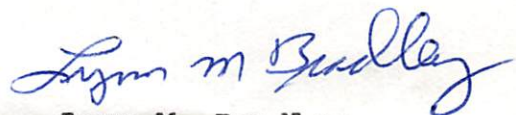

Mr. Bill Nittler
P. O. Box 93
Naturita Co. 81422

Dear Bill:

Thanks for the DX report. We get out fairly well since we have a center of radiation of 970 feet for our antenna.

Our automation equipment is located at our studios on Walnut street. We then go across town by telephone lines to our Micro-Wave Transmitter, beam up to Trafalger, about 27 air miles to our transmitter site. The remote control point is located south of Bloomington at our AM transmitter site. The four locations get confusing at times, like when something quits or a proof of performance.

Thanks again for the report.

Lynn M. Bradley

Chief Engineer
