

July 11, 1995

Bill Nittler
Box 824
Mancos, CO 81328

Dear Bill:

This will confirm your reception of WAMZ on July 1, 1995 at 5:20 pm EDT.

WAMZ operates on 97.5 MHz with 100,000 watts effective radiated power. Our 320' tower is located on a hilltop south of Louisville.

Several years ago we had another reception report from Colorado. Certainly it is unusual for FM signals to travel that far, but when conditions are right it does happen.

Thanks for your interesting report!

Best regards,

A handwritten signature in cursive script that reads 'Charles R. Strickland'.
