

Bill Nittler
P.O. Box 824
Mancos, CO 81328

Dear Mr. Nittler,

This is to verify your reception of KUMR-FM on a frequency of 88.5 MHz, on August 17, 2003. KUMR is owned by the Curators of the University of Missouri and is affiliated with National Public Radio. KUMR broadcasts 100,000 watts of effective radiated power via twin Harris 10H-3 transmitters, vintage 1973. The output of both transmitters is combined through a passive matrix for a total of 19.6K watts of transmitter power. Most of our effective radiated power is courtesy of a new, circularly polarized, ERI, 10 bay antenna, with a gain of 5.68, atop our 400 foot tower. It's always fun to receive these kind of reception reports, thanks! A few years ago I received a DX report from Italy!! Thanks, again!

Chuck Knapp
Chief Engineer-KUMR
