April 23, 1997

Dear Bill,

Well, I just came across your letter while doing my annual desk cleaning. Better late than never, huh! Yes, you were definitely tuned in to the Mountain. We have a 100,000 watt station tower on one of the highest peaks in the state giving us the most powerful signal around. We are a AAA, Adult Alternative Album, station.

So there you have it. This is absolutely the farthest our signal has reached, that has been reported. Thank you for taking the time to let us know, and I apologize for the length that it has taken me to respond.

Thank you,

A handwritten signature in blue ink that reads 'Cole Croshaw'.
