Thursday, May 10, 1979

Bill Nittler  
603 W. 1st  
McCook, Neb. 69001

Bill:

First, accept my personal apology for failure to reply to your earlier request for verification, as it was almost certainly an oversight on my part. Since returning to my former job as KWEY's Chief Engineer after an absence of six years, I've been swamped trying to "catch up."

I am pleased to confirm your reception of KWEY-FM on February 14, 1979, on the basis of your outline of program details.

I've enclosed some market data and promotional material for your collection.

KWEY-FM operates with 69 KW ERP, with a Rockwell/Collins 831G-2 transmitter into a 10-bay side mounted Collins antenna on a 300 ft. tower (400ft. HAAT).

Best Regards,

Harry B. Gilstrap  
Chief Engineer
