Mr. Bill Nittler
603 W. First Street
McCook, Nebraska 69001

Dear Mr. Nittler:

Thank you very much for your interesting letter regarding your reception of our FM signal on September 29, 1977.

We are always happy to verify these reception reports from such great distances. Over the years, we have received many reports from coast to coast within the continental U.S. and many points in Canada.

KXXY-FM Stereo operates on a frequency of 96.1 MHZ with maximum allowable radiated power using a circular polarization antenna system, side mounted on our 300 foot AM tower, and fed by a Harris (Gates) FM20H3 transmitter.

We also operate KOCY-AM on 1340 KHz with a daytime power of 1KW and 250 watts night-time, non-directional.

Best regards,

Paul Cinnamon
