Dear Mr. Nittler:

I'm really sorry it took so long to confirm your report, but I just now found your letter; it got buried under some other things on my desk.

I checked the log and found out that you were 100% correct. Skips are always fun to receive because you never know what you are going to find. Thanks for letting us know and being so precise in your documentation.

Sincerely yours,

James A. Lacock
Chief Engineer, KWAX
