Dear Sir:

Many thanks for your interesting letter regarding your reception of W D N X July 7, 1985. You have correctly identified the station, and the programs that were broadcast at that date and time.

Since I am a radio amateur (although not a very active one) in addition to being involved with W D N X, I can really appreciate your description of the equipment that you used in this rather unusual radio contact.

W D N X employs a 9-bay antenna approximately 225 feet above average terrain, and our transmitter was putting about 5 kw into the line at the time.

W D N X is licensed to Rural Life Foundation and Harbert Hills Academy. The Academy is a small rural co-educational school, grades 1 through 12, located in southwest Tennessee near the Alabama- Miss. border. The Academy is church related (Seventh-day Adventist).

Best Wishes,

Albert Nielsen

Albert Nielsen
Station manager.
