June 3, 1980

Bill Nitler  
Box 93  
Naturita, CO 81422

Dear Bill:

I received your letter dated May 29th, 1980 reporting your reception of our station in Naturita, Colorado on the same date. By looking at our programming log for that date from 9:10pm through 9:53pm, I have been able to verify that you did, indeed, monitor our signal as our actual program log does correspond to your logged program details.

It's fascinating that you were able to pick us up on that date as, to the best of my knowledge, your report is the farthest such reception ever reported to us. I appreciate your taking the time to write us and inform us of your reception of FM 95.

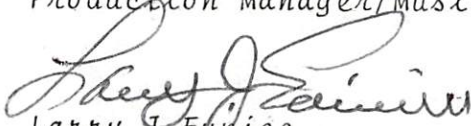

Enclosed, find one of our KELT stickers for you to put with any other souvenirs of other radio stations that you've received.

Should you ever be down in the Rio Grande Valley of South Texas, please stop in and say "hello". KELT is a 100,000-watt FM radio station, broadcasting at the frequency of 94.5 MHz. Our format is Modern Country and we are the number one radio station in the Valley with adults age 25-64 (according to the latest Arbitron survey).

Again, thanks for taking the time and effort to write us. We hope this letter will serve as sufficient verification of your reception. And, good luck in your future dial scanning...we hope you'll pick us up again.

Yours in Radio,

William B. Dear,  
Production Manager/Music Director

  
Larry J. Eunice,  
Operations Manager
